ROMAN HEUSER

PRODUCT & GROWTH INTERNSHIP · CONSUMER TECHNOLOGY

Las Vegas, NV · Reno, NV · 702-885-9747 · heuser@romanattitudeofgratitude.com

PROFILE

Business freshman who has already shipped two consumer products, been hired by a funded startup to own its frontend, and run a service business of my own. Looking for a product or growth internship where deciding what to build and talking to the people who use it are the same job.

PRODUCT & DESIGN

Frontend Design Lead — TagData

((START)) – PRESENT

Consumer data-privacy startup · $3.5M invested

- **Hired to recreate the frontend and given full authority over the redesign** — the surface every user touches.
- **Replaced a set of one-off screens with a single design system**, so color, type, spacing and motion resolve to one source of truth and every new screen ships consistent by default.
- **Turned a hard technical limit into a product rule**: QR codes cap near 1.6 KB, so oversized share cards degrade to a link instead of silently failing to scan.

Founder — GoMojo

((START)) – PRESENT

Consumer AI concierge · Las Vegas · live users

- **Shipped a seven-agent AI concierge for under $1,000 in total cost** that turns a stated vibe and budget into a full night out in about six seconds.
- **Priced it from the cost base, not the market** — low infrastructure cost made a genuinely free tier and a $5 paid tier viable where the category defaults to $50.
- **Chose PWA over native to delete the download step**, cutting the install funnel to a single tap and removing app-store review from every release.
- **Rebuilt the recommendation logic after auditing the review data** and finding manipulated rating distributions; replaced raw star averages with consistency and cross-source agreement.

Builder — GoInvest

((START)) – PRESENT

Multi-agent research sandbox · educational

- **Designed eight AI investor personas that must disagree before a decision is made**, including a dedicated adversarial reviewer whose only job is to attack the thesis.
- **Wrote the safety constraints as hard product rules**: paper trading only, and an "educational, not investment advice" label on every user-facing screen.

CUSTOMER-FACING & OPERATIONS

Three years of direct customer work

((2025)) – PRESENT

- **Owner & Operator, pressure washing service** — source, quote, schedule and deliver exterior cleaning for homes being prepared for inspection and sale. My own P&L, my own deadlines.
- **Valet Attendant, Nevada Premier Valet** — responsible for customer vehicles and keys through peak arrival and departure volume.
- **Grill Cook, Lee Canyon** — high-volume resort line through peak lunch service.
- **Restaurant Team Member, Maggiano's Little Italy** — nine months of full-service dinner shifts.

EDUCATION

University of Nevada, Reno

EXPECTED ((2030))

B.S., Business Administration — Freshman

SKILLS

Product	Scoping & prioritization, pricing & packaging, user research, launch execution, product writing
Data	Microsoft Excel, SQL, PostgreSQL, analytics instrumentation
AI	Prompt engineering, multi-agent system design, evaluating model output quality
Technical	JavaScript/TypeScript, React, Next.js, Python, C#/.NET, Git
Customer	Service under pressure, quoting & scheduling, cash handling, conflict resolution

Tailored version — edits made by Roman Heuser using AI-generated critique as guidance. AI did not write this document. See the prompt engineering reflection on the Resume page.
